

# KINDRA WINTER NEWSLETTER

## KINDRA PROJECT FINAL CONFERENCE

As KINDRA reaches its end, having achieved important milestones in the project's life, the Consortium proudly invites you to the Final Conference the 27th of February of 2018 in the Académie Royale de Belgique, Brussels.

The main goal of the event is to widely communicate the results of the project: the European Inventory on Groundwater Research (EIGR) -an online tool exclusively dedicated to groundwater research and knowledge- and the Harmonized Research Classification System (HRC-SYS) as well as the methodology for identifying gap analyses and its results, and start a conversation about the future of the EIGR.

For more detailed information on the Final Event, please visit our project website: [www.kindraproject.eu](http://www.kindraproject.eu). For further updates please follow KINDRA project on Facebook, Twitter (@kindraproject) and LinkedIn.

## BECOME AN EDITOR!

Please contribute to the EIGR by uploading new records, please complete the registration form (<http://kindraproject.eu/eigr/>) and send it to [reg@kindraproject.eu](mailto:reg@kindraproject.eu).

Editors will receive a password that gives access. Editors are also welcome to provide any advice or suggestions that may contribute to the long-term exploitation of the Inventory.

## HAPPY NEW YEAR

The KINDRA Consortium would like to wish all of you a happy new year and thank your invaluable help in our mission to make groundwater visible, accessible and esteemed.

In this coming year our project will reach its end, but this does not mean our mission is over.

Groundwater is and will always be an important asset in Europe, thus, research and classification of our resources is of utmost priority. Consequently, us and "the water people" all through Europe will persevere to pursue scientific knowledge in order to protect the future of our groundwater and, consequently, the future of Europe.

Merry season and all our best for 2018.

# EFG NATIONAL ASSOCIATIONS' HUGE SUPPORT TO KINDRA

KINDRA would like to thank the National Associations of the European Federation of Geologists for actively contributing to the success of the project by having collected with national experts most of the data currently available in the EIGR.

In addition to general communication and dissemination activities, as part of WP2, national associations organised a series of workshops in their countries respectively (more information on Linked Third Parties can be found <http://kindraproject.eu/efg-ltpps/>).

## SECOND TUTORIAL

KINDRA Consortium has published the EIGR second tutorial video. It explains how easy it is to search in the European Inventory on Groundwater Research. The first video instead explained how to insert metadata in the Inventory.

To watch our videos, visit our website or our Youtube Channel, Kindra Project.
