

2017-2018 EDITION

2nd level Master in Petroleum Geoscience

The University of Basilicata, in cooperation with Shell Italia E&P, Total E&P Italia, ENI S.P.A., and Confindustria Basilicata promotes a one-year Master course on Petroleum Geoscience. The Master covers a wide range of subjects by integrating the research-based expertise of the academicians with the methods and practices of the modern oil&gas industry. **The goal is to prepare young graduates for companies active in the energy sector, and allied service industries, as experts of reservoir development and production.**

The **Master course** will be delivered by a selected staff of University professors and expert technicians of the supporting companies.

All teaching activities will take place in Potenza.

Participation fees are fixed at Euro 3,000.

A Euro 2,000 scholarship will be provided to the top 4 meritorious applicants.

The **team project** and **internship opportunities** will be offered by the supporting companies and others operating in the energy market of Italy.

Potential candidates should possess a Laurea Magistrale degree (second level in the 3+2 system) in Geology, Geophysics, Natural Sciences, and Mining, Petroleum, Environmental, and Civil Engineering. Equivalent foreign degrees are also accepted.

The maximum number of accepted participants is 10.

The **deadline for online application is October 31st 2017:**
